Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 and 2, drawn to a statement within an envelope having address windows and a method for providing such statement within such envelope, classified in class 229, subclass 303.
 - II. Claim 3, drawn to a method for determining the accuracy of items prepared by a bulk mailer, classified in class 705, subclass 410 or class 700, subclass 225.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as for use in a different mail tracking system having no mailing facility. In the instant case, invention II also has separate utility such as for use with a system with envelopes having no transparent window. See MPEP § 806.05(d).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
